

FRANCISCAN FITNESS CENTER (FORMERLY ST. JAMES HEALTH & WELLNESS) JOINS THE TMI COMMUNITY!

*"Prior to the TMI installation, my largest issue was **combined chlorine** in the lap and therapy pool. I couldn't keep it below 1.0. I used to shock the two pools once per week. Since we installed the **TMI UV Systems** I don't need to shock any longer."*

"The TMI UV Systems were installed on both my pools on December 14, 2015. The combined chlorine numbers are great. They have dropped from 1.4 to 0.2 on both pools."

- Bill Sutton,
Operations Manager
Franciscan Fitness, IL

Many states have or are planning to mandate UV as secondary disinfection systems! Have you checked your state's regulations?

TMI offers the latest in sanitation technology, keeping you and your patrons safer from bacteria and recreational water illnesses.

Ultra Violet sanitation can eradicate up to 99.99% of bacteria. Many local codes are now requiring a supplemental sanitation system.

Our SaltSynergy® Ultra Violet sanitation systems in conjunction with a TMI chemistry and SaltPure® saline generator makes for the best feeling water for your facility.

TMI OFFERS BOTH NSF LISTED AND NON-NSF LISTED UV SYSTEMS!

- ° **SIMPLE TO INSTALL**
- ° **MINIMUM MAINTENANCE**
- ° **AFFORDABLE PARTS**

*"The UV systems are installed and everything went well, the **combined chlorine levels dropped to almost zero** within the first 24 hours, and the smell has gone. Also we have not had any of the rusting issues since the units were installed. Thank You!"*

-Kyle Barsi
Maintenance Technician, CPO®
Riverside Health Fitness Center, IL
